Tools	: Eclipse, NetBeans, IntelliJ Idea

WORK EXPERIENCE

March 2016 - Now

Hi-GATE INFOSYSTEMS

Project – CRM (Customer Relationship Management)

Project Description:

This is an internal project of company for efficient customer management. It involves technology to automate various aspects related to customers i.e. sales, marketing, customer support, reporting, collection, complaints etc.

Responsibilities:

- Design, Develop & Maintenance of various owned modules.
- Actively participate in architecting new modules and enhancements.
- Debugging and Analysis of QA reported bugs.
- Work with other teams for problem solving and designing of modules.
- Guiding juniors as a mentor towards task completion.

Project – MCRM (Mobile-CRM Service Implementation)

Project Description:

There is an android app of the CRM which is named as MCRM. This project is bridge between the MCRM and the Web CRM. This is a server side implementation of the MCRM. Basically this project handles all the sustained and live data of the MCRM due to the low or no connectivity of the internet with the mobile device. MCRM works online as well as offline also. Whenever there is no connectivity it stores all the data in some directory files and uses the MongoDB as well to save the data attributes and the requests. This project keep on checking the requests and directory files and store them in to actual database and performs the needed operations.

Responsibilities:

- Design & Development of the complete service side implementation.
- Debugging and Analysis of QA reported bugs.
- Contribution on the problems solving of the MCRM and the service implementation.
- Work with android team as well for designing of the module.

PERSONAL DETAILS

- Date of Birth : Jan 19, 1994
- Nationality : Indian
- Marital Status : Single
- Languages Known : English, Hindi and Telugu.
- Hobbies : Listening to music and Playing Cricket.

DECLARATION:

I hereby confirm that the details furnished above are true to the best of my knowledge.
